

Changes Document

Team Name: Sunrise Inc

Sprint: 5

Requirements Document

- Updated requirements to include the **Reminders feature** for managing pet-related events such as vet visits and medication schedules.
 - Expanded feature list to include:
 - Pet care reminder system
 - Contact integration with Missing Pet Alerts
 - Completed Tips & Toxic Foods informational module
 - Updated functional requirements to include:
 - R8: Pet Care Reminders
 - R9: Contact selection when generating missing alerts
 - Updated system description to reflect improved interaction between modules (Pets, Contacts, Alerts, and Reminders).
 - Updated non-functional requirements to include improved usability expectations and better module integration.
-

Design Document

- Updated **Information Architecture description** to include the Reminders module and completed Tips & Toxic Foods feature.
- Revised **Design Summary** to describe new features implemented during Sprint 5, including reminders and improved contact integration.
- Updated **Design Rationale** to explain design decisions focused on usability improvements and expanded application functionality.

- Added new screenshots showing:
 - Reminders feature interface
 - Tips & Toxic Foods informational screen
 - Updated UI documentation to reflect improved workflow when creating missing alerts using saved contacts.
-

Test Plan / Activity Tracker

- Added new test cases for:
 - Reminder creation and editing
 - Reminder deletion and completion status
 - Contact selection during missing alert creation
 - Tips & Toxic Foods search and filtering
 - Updated Sprint 5 column with statuses (Green/Yellow/Red) for all relevant tests.
 - Added notes documenting successful integration between Contacts and Missing Alerts.
 - Updated **TestPlanTracker.xlsx** to reflect Sprint 5 feature validation and testing results.
-

AI Log

- Logged AI-assisted support for:
 - Flutter UI improvements for reminders and safety

Design Document

- Updated **README.md** to include:
 - Description of the Reminders feature
 - Information about the Tips & Toxic Foods module
 - Updated feature list reflecting Sprint 5 functionality
- Updated Sprint 5 reflection section in the submission document.
- Updated Trello board tasks to reflect completed Sprint 5 features and upcoming Sprint 6 improvements.
- Ensured repository reflects new modules and updated UI structure introduced during Sprint 5.

Test Plan / Activity Tracker

- Added new test cases for Sprint 5 features including:
 - Reminder creation and editing
 - Reminder deletion and completion status
 - Contact selection when generating missing alerts
 - Tips & Toxic Foods information display and filtering
- Updated existing test cases to ensure compatibility with newly integrated modules (Contacts, Alerts, and Reminders).
- Updated Sprint 5 column with statuses (Green/Yellow/Red) for all relevant tests.
- Added notes documenting successful reminder functionality and correct integration between contacts and missing alerts.
- Updated **TestPlanTracker.xlsx** to reflect Sprint 5 feature testing and validation results.

AI Log

- Logged AI-assisted support for test-case generation, Flutter code review, and document editing.

Other Documents Updated

- Updated **README.md** to include:
 - Description of the Reminders feature
 - Information about the Tips & Toxic Foods module
 - Updated feature list reflecting Sprint 5 functionality
- Updated Sprint 5 reflection section in the submission document.
- Updated Trello board to reflect Sprint 5 feature completion and next sprint planning.
- Ensured repository reflects newly added reminder functionality and updated module integrations.
