

Changes Document

Team Name: Sunrise Inc

Sprint: 4

Requirements Document

- Updated requirements to reflect migration from local storage to Firebase Firestore for pet profiles.
- Updated system requirements to include Firebase Firestore and Firebase Storage integration.
- Expanded feature list to include:
 - Cloud-based pet data storage using Firestore
 - Firebase Storage integration for pet images
 - Microchip number field within pet profile
 - Cross-device data synchronization
- Revised functional requirement R1 to reflect cloud storage and microchip integration.
- Updated non-functional requirements to include cloud persistence, data synchronization, and secure Firestore access rules.

Design Document

- Updated Information Architecture to reflect migration from hybrid local/cloud design to full cloud-based pet data storage.
- Revised ER/architecture description to indicate Firestore collections instead of local JSON storage.
- Updated Design Summary to describe backend migration to Firebase Firestore and Storage.
- Updated Design Rationale to explain transition from local-first model to scalable cloud-based architecture.

- Added/updated screenshots reflecting microchip field addition and cloud-synced pet profiles (if applicable).

Test Plan / Activity Tracker

- Updated existing test cases to reflect Firestore-based storage instead of local storage.
- Added new test cases for:
 - Firestore pet creation and retrieval
 - Image upload to Firebase Storage
 - Microchip number save and retrieval
 - Cross-device synchronization testing
- Updated Sprint 4 column with statuses (Green/Yellow/Red) for all relevant tests.
- Added notes documenting successful cloud persistence after app restart.
- Updated TestPlanTracker.xlsx to reflect Sprint 4 backend migration and validation results.

AI Log

- Logged AI-assisted support for test-case generation, Flutter code review, and document editing.

Other Documents Updated

- Updated README.md to include:
 - Firestore setup information
 - Firebase Storage configuration notes

- Updated feature list reflecting cloud integration
- Microchip number feature description
- Updated Sprint 4 reflection section in submission document.
- Ensured repository reflects new backend structure and version history for Sprint 4 migration.
