

Changes Document

Team Name: Sunrise Inc

Sprint: 3

Requirements Document

- Added cloud-enabled requirements reflecting new Firebase Authentication integration.
- Updated system requirements to include internet dependency for login/signup, while keeping pet data local-first.
- Expanded feature list to include:
 - User authentication (email + password)
 - Cloud-linked user sessions
 - Missing Alert storage & retrieval across sessions
- Added new non-functional requirements for security, including password rules, authenticated access, and protected error messaging.
- Revised problem statement to include Sprint 3's focus on connecting offline features with cloud-based user accounts.

Design Document

- Added new wireframes and emulator screenshots for:
 - Login screen
 - Signup screen
 - Authenticated Home Screen
 - Missing Alert creation + detail screens
- Updated Information Architecture to show the separation between local pet storage and cloud-backed authentication.
- Documented new navigation flows:
 - User enters app through Login → Home
 - Redirect logic added for logged-in vs logged-out states
- Updated design rationale to explain the shift from offline-only to hybrid cloud/local design, with emphasis on secure onboarding and more scalable user access.

Test Plan / Activity Tracker

- Added new test cases for:
 - Creating a Firebase account
 - Logging in and handling incorrect credentials
 - Redirecting authenticated users to Home Screen
 - Protecting pages from unauthorized access
- Updated the Sprint 3 column with statuses (Green/Yellow/Red) for all tests.
- Added new notes for cloud features, including:
 - Email/password validation
 - Error handling (wrong-password, user-not-found)
 - Login persistence after app restart
- Documented outcomes of Missing Alert creation using authenticated sessions.
- Updated TestPlanTracker.xlsx to include all new Sprint 3 test results.

AI Log

- Logged AI-assisted support for test-case generation, Flutter code review, and document editing.

Other Documents Updated

- Updated README.md to include Sprint 3 additions:
 - Firebase setup steps
 - Login/Signup instructions
 - Current feature list (local + cloud)
 - Screenshots of the authentication flow
- Added Sprint 3 reflection section.
- Linked the new Firebase configuration files (google-services.json & GoogleService-Info.plist) in repository documentation.
